DETAILED ACTION

Response to Amendment

The amendment filed on 12/29/2005, applicant added new claims 21-26. Due to the new added claims, the following restriction is required since there are different species clearly addressing in these claims.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

A. Claims 3 and 13 drawn to a liquid crystal device comprising a second light absorbing film 38a formed under the source electrode 38b and a third light absorbing film formed under the drain electrode as shown in Fig. 5 (if the light absorbing films are made of oxidation film or nitride film or back resin, which is insulating material, the device can not operate since the insulating material layer formed between the source electrode 28a/the drain electrode 28b and ohmic contact layer 26; therefore, TFT can not function).

B. Claims 4 and 14 drawn to a liquid crystal device comprising a second light absorbing film 38 formed under the semiconductor or active layer as shown in Fig. 6, (however, nowhere in specification discloses the second light absorbing film 38 made of oxidation film or nitride film or back resin).

Art Unit: 2871

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 1-2, 5-8, 12, 15-26 are generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims and any drawings readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HOAN C. NGUYEN whose telephone number is (571) 272-2296. The examiner can normally be reached on MONDAY-THURSDAY:8:00AM-4:30PM.
